> Cautionary Statements

This presentation contains forward-looking statements within the meaning of securities legislation in the United States and Canada, including statements regarding exploration efforts, expectations regarding the anticipated results of the 2024 notes offering, tender offer and redemption of the 2021 notes, the La Preciosa project and the timing of publication of a Preliminary Economic Assessment (PEA), growth strategies and initiatives, acquisition criteria, development efforts at Palmarejo and Kensington, expansion at Rochester, production, costs, and expenses. Such forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause Coeur's actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Such factors include, among others, the risk that production, cost, and expense levels are not attained, the risks and hazards inherent in the mining business (including risks inherent in developing large-scale mining projects, environmental hazards, industrial accidents, weather or geologically related conditions), changes in the market prices of gold and silver and a sustained lower price environment, the uncertainties inherent in Coeur's production, exploratory and developmental activities, including risks relating to permitting and regulatory delays, ground conditions, grade variability, any future labor disputes or work stoppages, the uncertainties inherent in the estimation of gold and silver ore reserves, changes that could result from Coeur's future acquisition of new mining properties or businesses, the loss of any third-party smelter to which Coeur markets silver and gold, the effects of environmental and other governmental regulations, the risks inherent in the ownership or operation of or investment in mining properties or businesses in foreign countries, the political risks and uncertainties associated with operations in Bolivia, Coeur's ability to raise additional financing necessary to conduct its business, make payments or refinance its debt, as well as other uncertainties and risk factors set out in filings made from time to time with the United States Securities and Exchange Commission, and the Canadian securities regulators, including, without limitation, Coeur's most recent reports on Form 10-K or Form 10-Q. Actual results, developments and timetables could vary significantly from the estimates presented. Readers are cautioned not to put undue reliance on forward looking statements. Coeur disclaims any intent or obligation to update publicly such forward-looking statements, whether as a result of new information, future events or otherwise. Additionally, Coeur undertakes no obligation to comment on analyses, expectations or statements made by third parties in respect of Coeur, its financial or operating results or its securities.

Christopher Pascoe, Coeur's Director, Technical Services and a qualified person under Canadian National Instrument 43-101, reviewed and approved the scientific and technical information concerning Coeur's mineral projects in this presentation. Mineral resources are in addition to mineral reserves and do not have demonstrated economic viability. Inferred mineral resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be considered for estimation of mineral reserves, and there is no certainty that the inferred mineral resources will be realized. For a description of the key assumptions, parameters and methods used to estimate mineral reserves and resources, as well as data verification procedures and a general discussion of the extent to which the estimates may be affected by any known environmental, permitting, legal, title, taxation, socio-political, marketing or other relevant factors, Canadian investors should see the Technical Reports for each of Coeur's properties as filed on SEDAR at www.sedar.com.

Cautionary Note to U.S. Investors - The United States Securities and Exchange Commission permits U.S. mining companies, in their filings with the SEC, to disclose only those mineral deposits that a company can economically and legally extract or produce. We may use certain terms in public disclosures, such as "measured," "indicated," "inferred" and "resources," that are recognized by Canadian regulations, but that SEC guidelines generally prohibit U.S. registered companies from including in their filings with the SEC. U.S. investors are urged to consider closely the disclosure in our Form 10-K which may be secured from us, or from the SEC's website at <http://www.sec.gov>.

Non-U.S. GAAP Measures - We supplement the reporting of our financial information determined under United States generally accepted accounting principles (U.S. GAAP) with certain non-U.S. GAAP financial measures, including adjusted net income (loss), adjusted EBITDA, net debt- and total debt-to-LTM adjusted EBITDA, adjusted costs applicable to sales per silver equivalent ounce, and adjusted all-in sustaining costs. We believe that these adjusted measures provide meaningful information to assist management, investors and analysts in understanding our financial results and assessing our prospects for future performance. We believe these adjusted financial measures are important indicators of our recurring operations because they exclude items that may not be indicative of, or are unrelated to our core operating results, and provide a better baseline for analyzing trends in our underlying businesses. We believe adjusted net income (loss), adjusted EBITDA, net debt- and total debt-to-LTM adjusted EBITDA, adjusted costs applicable to sales per silver equivalent ounce, and adjusted all-in sustaining costs are important measures in assessing the Company's overall financial performance.

Gold and silver equivalence assumes silver-to-gold ratio of 60:1 unless otherwise noted. Average spot prices and average silver-to-gold ratio for fiscal years 2013, 2014, 2015, and 2016, and quarters ended March 31, June 30, September 30, and December 31, 2016, and March 31, 2017 are provided in the appendix to this presentation.

1 Repositioned, lower cost portfolio

- ✓ Balanced precious metals asset base
- ✓ Strong execution of high-quality expansions
- ✓ Complementary, well-timed strategic acquisitions
- ✓ Lower costs driving higher margins

2 Conservative and flexible balance sheet

- ✓ Capable of supporting future growth
- ✓ Strong liquidity

3 Strengthened focus on growth

- ✓ Continued execution of ongoing development initiatives
- ✓ Expanded exploration program
- ✓ Disciplined M&A

 (3) Based on mining costs per ton of \$1.24 for full-year 2016 compared to \$2.30 compared to 2013.
 (4) Based on CAS per AuOz of \$795 for full-year 2016 compared to \$1,227 for full-year 2012. See non-GAAP reconciliation tables in the appendix to this presentation.

① ... And Complementary, Well-Timed Acquisitions...

Wharf Resources (February 2015)

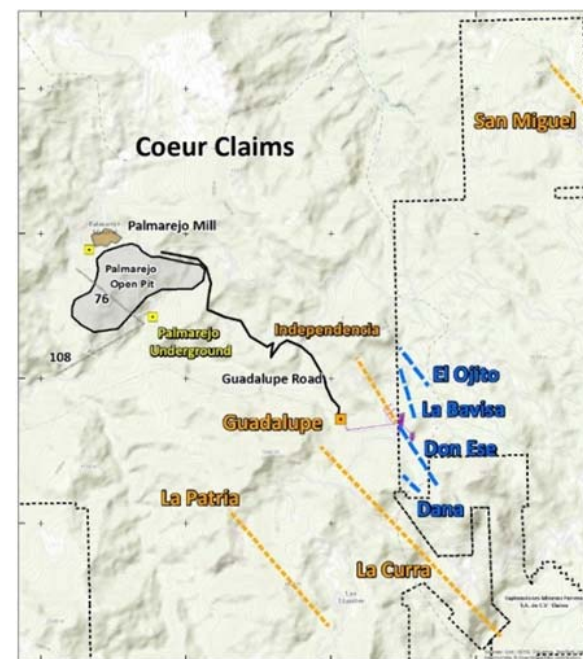

- Acquired from Goldcorp for \$99 million in cash
- Significant U.S. NOL tax synergy
- Improved plant recovery rates by approximately 15% since acquisition
- Increased production and decreased costs in 2015 and 2016
- Generated \$94 million of free cash flow¹ through 1Q 2017
- Increased gold reserves by over 27%² within the first year

Cumulative FCF¹
(\$M)

Paramount Gold and Silver (April 2015)

- Acquired for \$146 million in Coeur shares
- Primary acquired assets were deposits adjacent to the Palmarejo mine
- Unlocked significant capex, cost savings, and synergies
- Free from any non-governmental 3rd party royalties or streams
- Significant exploration potential

(1) Free cash flow is defined as cash flow from operating activities less capital expenditures and gold production royalty payments. See reconciliation tables in the appendix to this presentation.

(2) Based on 560,000 ounces of gold reserves reported by Goldcorp in its Annual Information Form dated March 31, 2014 ("AIF") for the financial year ended December 31, 2013 and 712,000 ounces of gold reserves as of December 31, 2015 as reported by Coeur. See reserve and resource tables in the appendix to this presentation.

① ... Delivering Record Production...

Ramp-up of Palmarejo underground operations expected to drive 50% growth in 2017E production and lead companywide growth and cash flow generation

Silver Equivalent¹ Production

(2) Midpoint of production guidance published by Coeur on April 26, 2017.

① ... At Higher Margins

Coeur's cost reductions have been primarily achieved through operational efficiencies, higher recovery rates and decreases in G&A, and to a lesser degree through lower input costs and more favorable foreign exchange rates

(3) Excludes transaction fees and call premium associated with the issuance of new senior unsecured notes and tender offer.

(4) Through May 31, 2017.

2 Refinancing Completes De-Risking Efforts

Transaction Rationale

- New 5.875% senior unsecured notes due 2024 (“2024 notes”) represent final strategic step to reduce balance sheet risk
- Extended debt maturity to 2024 clears sector-wide maturity wall in 2020/2021
- Incremental cash provides flexibility while annual interest expense is held stable due to 200 bps coupon reduction
- Maintains the Company’s strong credit metrics

2Q 2017 Expected Financial Impact¹

Income Statement

- ~\$10 million loss on early repayment of 2021 notes
 - ~\$2 million non-cash write-off of unamortized issuance costs and premium received
 - ~\$8 million tender/redemption premium

Cash Flow Statement

- Cash flows from operating activities
 - ~\$5 million of accrued interest on 2021 notes paid
- Cash flows from financing activities
 - ~\$245 million in net proceeds received from 2024 note issuance
 - ~\$186 million used to pay principal (~\$178 million) and tender/redemption premium (~\$8 million) on 2021 notes

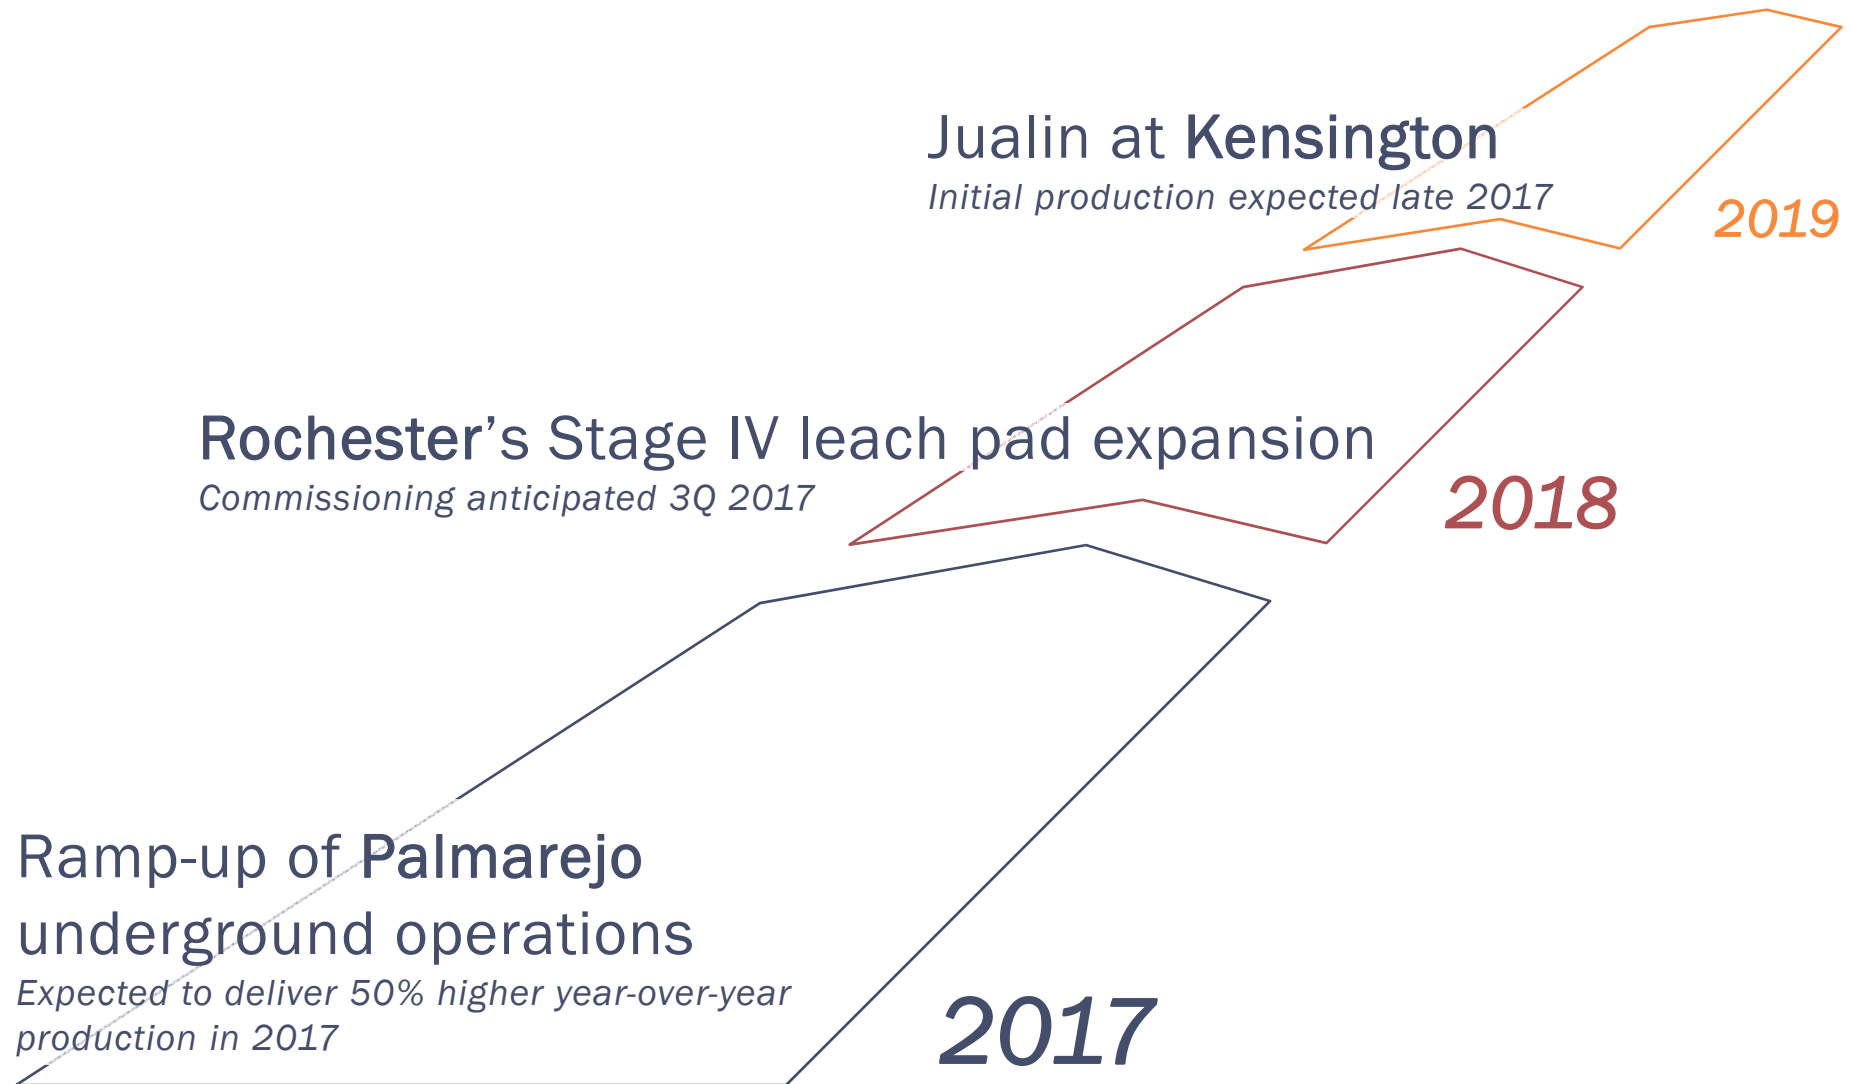

Balance Sheet

- ~\$54 million of incremental cash
- ~\$69 million of incremental debt (net of ~\$5 million of issuance costs associated with 2024 notes, which will be amortized over the life of the notes)

(1) Based on capitalization as of March 31, 2017, adjusted to give effect to (i) the issuance of \$250 million of 2024 notes on May 31, 2017, (ii) the tender of \$118 million of 2021 notes on May 31, 2017, and (iii) \$60 million of 2021 notes to be redeemed on June 30, 2017.

③ Forging Ahead on Key Development Projects

Near-term organic growth initiatives are well underway and expected to generate high returns by leveraging existing infrastructure

3 Expanded Exploration Program

Broadened scope of 2017 exploration program expected to build on 2016 efforts by focusing on increasing reserves and expanding mine lives

Exploration Program

(\$M)

- Approximately 75% of 2017 exploration budget earmarked for near-mine exploration
- 17 drill rigs active at the end of Q1 2017 compared to just 3 one year earlier
- 25,000 meter drill program completed at La Preciosa in support of new geologic model and PEA expected later this year
- Preliminary results of expansion drilling at Palmarejo are encouraging
- North America-focused greenfield exploration efforts accelerated

(1) Based on midpoint of guidance published by Coeur on April 26, 2017.

3 Coeur's Bolstered Growth Pipeline

In addition to near-term organic growth initiatives, Coeur continuously evaluates medium- and long-term opportunities

Maintain Discipline

- Operational and cost performance
- Balance sheet conservatism
- Culture of continuous improvement

- Ramp-up at Palmarejo
- Development of Jualin
- Rochester leach pad expansion

Execute Ongoing Initiatives

Extend Mine Lives

- Expanded near-mine exploration

- Re-evaluation of La Preciosa
- Early stage exploration investment
- Disciplined M&A

> Organic Growth Remains a Priority

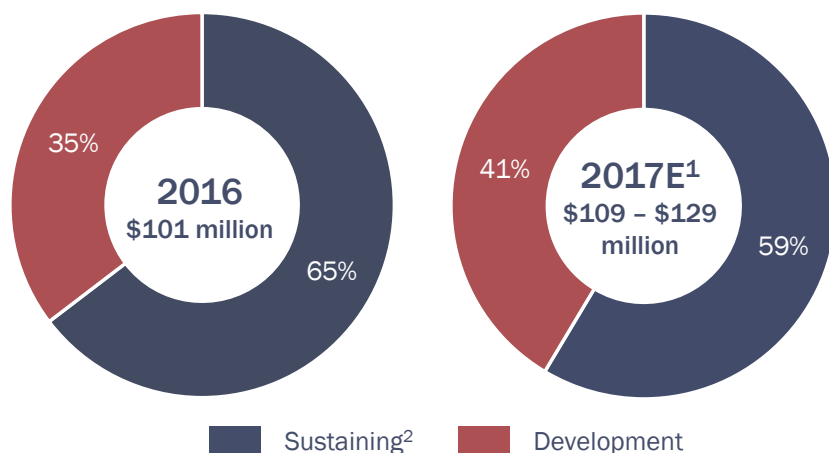

Capex by Mine Site

2017 capital expenditures expected to total \$109 - \$129 million¹

- \$11 - \$13 million of capitalized exploration
- **Palmarejo:** \$40 - \$45 million
 - Ongoing development of UG operations at Guadalupe and Independencia
 - Includes capitalized exploration of ~\$5 million
- **Rochester:** \$30 - \$35 million
 - Completion of stage IV leach pad expansion
- **Kensington:** \$30 - \$35 million
 - Continued development of Jualin
 - Includes capitalized exploration of ~\$3 million

Capex Composition

(1) Guidance published by Coeur on April 26, 2017.

(2) Sustaining capex excludes capital leases.

Highlights

- Development of Guadalupe and Independencia continues with silver and gold production expected to increase over 50% from 2016 to 2017¹
- Strong exploration focus on resource conversion and expansion
- First gold sale to Franco-Nevada under new, more favorable stream agreement took place in 4Q 2016

(1) 2017 guidance published by Coeur on April 26, 2017. Estimates based on midpoints of guidance.
 (2) See non-GAAP reconciliation tables in the appendix to this presentation. Gold and silver equivalence assumes silver-to-gold ratio of 60:1 unless otherwise noted. Average spot prices and average spot silver-to-gold ratios for fiscal years 2013, 2014, 2015, and 2016, and fiscal quarter ended March 31, 2017 are included in the appendix to this presentation.

(3) Excludes gold production royalty payments to Franco-Nevada.
 (4) Excludes third-party refining charges.
 (5) Excludes management fee allocated from corporate.

> New Palmarejo Agreement Driving FCF¹ Growth

- New, more favorable gold stream agreement with Franco-Nevada Barbados took effect in August 2016
 - Applies to 50% of gold production from legacy Palmarejo land package
 - Franco-Nevada to pay \$800 per ounce vs. \$416 per ounce under the old royalty agreement
 - No annual minimum delivery amounts and no requirement to prioritize ounces subject to the stream over ounces not subject to the stream
 - Coeur paid \$2 million to terminate the prior royalty stream agreement in 2014
 - Franco-Nevada paid \$22 million to Coeur Mexico in 2015 to help fund development of Guadalupe
- Material from the Independencia Este deposit, where mining is currently ramping up, is not subject to the gold stream

(1) Free cash flow is defined as cash flow from operating activities less capital expenditures and gold production royalty payments. See non-GAAP reconciliation tables in the appendix to this presentation.

> Financial Statement Impacts of FNV Agreement

Previous Royalty Agreement

New Stream Agreement

Income Statement

- 100% of gold sales recorded at spot prices
- Fair value adjustments recorded to reflect changing gold prices on minimum ounce requirement

- Gold sales to FNV recorded at \$800 per ounce plus deferred revenue

Cash Flow Statement

- 100% of gold sales included in cash flow from operating activities at spot prices
- Gold production royalty payments recorded as cash used in financing activities

- Gold sold to FNV included in cash flow from operating activities at \$800 per ounce, with deferred revenue component eliminated as non-cash

Balance Sheet

- Minimum ounce requirement recorded as a royalty liability

- \$22 million deposit by FNV recorded as deferred revenue to be recognized in revenue over life of the mine

Highlights

- Tons placed in 2016 increased 19% year-over-year to 19.6 million tons, the highest level since Rochester first began operating in 1986
- Year-end 2016 silver and gold reserves increased over 40% and nearly 70%, respectively, extending Rochester's mine life by several years³
- Commenced construction on Stage IV leach pad expansion in July 2016; construction remains on-schedule and on-budget, with completion expected in 3Q 2017

(1) 2017 guidance published by Coeur on April 26, 2017. Estimates based on midpoints of guidance.
 (2) See non-GAAP reconciliation tables in the appendix to this presentation. Gold and silver equivalence assumes silver-to-gold ratio of 60:1 unless otherwise noted.  (3) See slides in appendix for additional information related to mineral reserves. Canadian investors should refer to the technical

report for Rochester on file at www.sedar.com.
 (4) Excludes third-party refining charges.
 (5) Excludes management fee allocated from corporate.

Production and Cost Performance

Highlights

- 2016 production remained near record levels at 124,331 ounces
- Development of nearby high-grade Jualin deposit expected to be the main driver of capital expenditures at Kensington in 2017, with initial production anticipated late in the year
- Exploration efforts targeting resource expansion and conversion at Kensington Main, Jualin, and Raven

(3) Excludes third-party smelting charges, which are reflected in average realized selling prices of concentrate production.

(4) Excludes management fee allocated from corporate.

Production and Cost Performance

Highlights

- Acquired in 2015 for \$99 million from Goldcorp
- Coeur's lowest cost operation and largest source of FCF⁴, generating over \$94M since acquisition through 1Q 2017
- Improved plant recovery rates by approximately 15% since the acquisition
- 2017 production expected to decrease due to anticipated completion of mining at the higher-grade Golden Reward deposit in mid-2017
- 2017 CAS per AuEqOz³ expected to increase as a result of lower production, higher tons mined compared to 2016, and one-time plant maintenance expenses

(5) Excludes third-party refining charges.

(6) Excludes management fee allocated from corporate.

Production and Cost Performance

Highlights

- Straightforward operation due to free-digging surface mining techniques (no drilling or blasting)
- Sourcing higher-grade, lower-cost ore from local third parties to increase mill feed grade, reduce costs, and improve cash flows
- Processing enhancements have improved recoveries over the past several years

> Non-Core Asset Divestitures

With the close of the Joaquin Project sale, Coeur has opportunistically divested assets for total consideration of \$51.2 million since the beginning of 2016

- Strengthens balance sheet
- Non-core assets
- Attractive valuation environment for streams and royalties
- Proceeds allocated to higher rate of return opportunities

Notes to 2016 mineral reserves and resources:

1. Effective December 31, 2016, except Endeavor, effective June 30, 2016.
2. Assumed metal prices for Mineral Reserves were \$17.50 per ounce of silver and \$1,250 per ounce of gold, except Endeavor at \$1,800 per metric ton of lead, \$2,200 per metric ton of zinc, and \$20.00 per ounce of silver.
3. Assumed metal prices for estimated Mineral Resources were \$19.00 per ounce of silver and \$1,275 per ounce of gold, except Endeavor at \$1,800 per metric ton of lead, \$2,200 per metric ton of zinc and \$20.00 per ounce of silver.
4. Mineral Resources are in addition to Mineral Reserves and do not have demonstrated economic viability. Inferred Mineral Resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be considered for estimation of Mineral Reserves, and there is no certainty that the Inferred Mineral Resources will be realized. The preliminary economic assessment for the re-scoped mine plan at Kensington is preliminary in nature and includes Inferred Mineral Resources, and does not have as high a level of certainty as a plan that was based solely on proven and probable reserves and there is no certainty that the results from the preliminary economic assessment will be realized.
5. Rounding of tons and ounces, as required by reporting guidelines, may result in apparent differences between tons, grade, and contained metal content.
6. For details on the estimation of mineral resources and reserves, including the key assumptions, parameters and methods used to estimate the Mineral Resources and Mineral Reserves, Canadian investors should refer to the NI 43-101 Technical Reports for Coeur's properties on file at www.sedar.com.

Notes to 2015 mineral reserves and resources:

1. Effective December 31, 2015 except Endeavor, effective June 30, 2015.
2. Assumed metal prices for estimated reserves were \$17.50 per ounce silver and \$1,250 per ounce gold, except for San Bartolomé, Rosario and lower 76 underground deposits at Palmarejo at \$15.50 per ounce of silver and \$1,150 per ounce of gold, Endeavor at \$2,400 per tonne zinc, \$2,200 per tonne lead and \$17.00 per ounce of silver, and Wharf at \$1,275 per ounce of gold. Proven and probable reserves (other than Endeavor) were also evaluated using \$15.50 per ounce of silver and \$1,150 per ounce of gold. It was determined that substantially all proven and probable reserves could be economically and legally extracted or produced at these lower price assumptions.
3. Assumed metal prices for resources were \$19.00 per ounce silver and \$1,275 per ounce gold, except (a) Endeavor at \$2,400 per tonne zinc, \$2,200 per tonne lead, and \$17.00 per ounce silver, and (b) Wharf at \$1,350 per ounce gold.
4. Mineral resources are in addition to mineral reserves and do not have demonstrated economic viability. Inferred mineral resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be considered for estimation of mineral reserves, and there is no certainty that the inferred mineral resources will be realized.
5. Rounding of tons and ounces, as required by reporting guidelines, may result in apparent differences between tons, grade, and contained metal content.
6. For details on the estimation of mineral resources and reserves, including the key assumptions, parameters and methods used to estimate the mineral resources and reserves, Canadian investors should refer to the NI 43-101-compliant Technical Report for Coeur's properties on file at www.sedar.com.

Notes to the above mineral reserves and resources:

1. Mineral Reserves and Mineral Resources estimate as reported by Goldcorp in its Annual Information Form dated March 31, 2014 ("AIF") for the financial year ended December 31, 2013, available to Canadian investors at www.sedar.com under Goldcorp's profile. As discussed in the AIF, Mineral Reserves and Mineral Resources were prepared by Goldcorp in accordance with NI 43-101 under the supervision of a qualified person. Coeur is not treating these historical estimates as current and has not completed sufficient work to classify the historical estimate as current mineral reserves or mineral resources for Coeur's purposes. Coeur's qualified person will review and verify the scientific and technical information of Goldcorp, as well as complete the other work necessary for purposes of preparing a 43-101 technical report, including validation of data quality, resource model accuracy, and costs used in reserve and resource cutoffs.
2. As discussed in the AIF, mineral reserves were calculated by Goldcorp using metal prices of \$1,300 per gold ounce and \$22 per silver ounce, and mineral resources were calculated using \$1,500 per gold ounce and \$24 per silver ounce. Mineral resources are in addition to mineral reserves and do not have demonstrated economic viability. Rounding of tons, as required by reporting guidelines, may result in apparent differences between tons and grade.

> Executive Leadership

Mitchell J. Krebs – President and Chief Executive Officer. During his twenty-year tenure with Coeur, Mr. Krebs has led nearly \$2 billion in capital raising and debt restructuring activities and has facilitated over \$2 billion of acquisitions and divestitures. Mr. Krebs was previously Coeur's Chief Financial Officer and held various positions in the corporate development department, including Senior Vice President of Corporate Development. Mr. Krebs is a Director of Kansas City Southern and the National Mining Association, President of the Silver Institute, and is on the Board of World Business Chicago.

Peter C. Mitchell – Senior Vice President and Chief Financial Officer. Mr. Mitchell came to Coeur from Taseko Mines Limited where he served as Chief Financial Officer, leading Taseko's financial operations, including sourcing strategic capital to fund the company's strategic growth plan. Previously, Mr. Mitchell was involved in leading and managing growth in private equity portfolio companies through acquisitions, integrations, and greenfield initiatives.

Frank L. Hanagarne, Jr. – Senior Vice President and Chief Operating Officer. Mr. Hanagarne was most recently Chief Operating Officer of Valcambi, SA, a precious metal refiner in Switzerland. Prior to his appointment as operations head of Valcambi in early 2011, Mr. Hanagarne was a Director of Corporate Development for Newmont Mining Corporation. Mr. Hanagarne's 17 years of service at Newmont has included positions of increasing responsibility within key areas of Newmont's operations and business functions as well as environmental, health, and safety.
